WORK EXPERIENCE

RESEARCHER

S&P Global

09/2018 - Present

S&P GLOBAL MARKET INTELLIGENCE : Mergers & Acquisitions

Responsibility

- Tracking down and researching M&A transactions across the globe for both company as well as asset level deals. Collecting and analyzing several data points including business models and operational activities of target, bidder and vendor; deal valuation; analysis of bidder statements; share prices etc. to make them directly available to clients through Market Intelligence and Capital IQ platforms.
- Identifying and calculating Deal Value, Net Debt assumed and considerations paid for target. Calculating Implied Equity value, Implied Enterprise value, Net transaction value, Gross transaction value and Total consideration to shareholders. Verifying the auto calculated ratios for the transaction.
- Secondary research for additional information for the transaction such as accretion/dilution, cost savings, gain/loss on sale, termination information, goodwill etc.
- Responsible for Mentoring new hires. Currently responsible for data quality of four researchers. Closely working and helping them with queries and improving on subject matter expertise with two of them already independent increasing the bench strength.
- Worked within parameters and with supervision to ensure quality and performance to set standards.
